and Information Science**

09 Dec 2014

Dear Sir/Madam,

It is my pleasure to give my endorsement to Aasmund Eldhuset as a lecturer and educator in the field of computer science. I have known him for over a decade, since he was a student in my algorithms course, and subsequently my main assistant for a time, lecturing for hundreds of students, and getting very positive feedback. In later years, he has held introductory workshops and supplementary lectures in several courses at the university, all of which have been highly regarded and very popular.

Last year, I was unable to give my lecture series on algorithms, and became aware of this rather abruptly. I needed a replacement on very short notice, and the first and only candidate I had in mind was Aasmund. He knows the material very well, and I was certain he would maintain the standards of this large and quite challenging course. Thankfully, he accepted the offer; he held the lectures and administrated the staff until I was able to return for the last couple of weeks.

All in all, my experience in working with Aasmund, both in general and last year specifically, has been exclusively positive. I am convinced that anyone hiring him for a teaching job will be satisfied—that he will take the task seriously, and will deliver a high-quality result. I know Aasmund to be charming, highly intelligent, hard-working and professional, and I have no reservations in recommending that you hire him for any teaching task for which you might be considering him. If you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Magnus Lie Hetland". The signature is written in a cursive style.

Magnus Lie Hetland
Associate Professor of Algorithms
